

Pairs

What you need: a pack of cards, a marker and a timer.

How to play:

- Use half the pack. Make sure that there is a pair of each number in the cards you are using.
- Place the cards face down and begin at a marker 6m away.
- Run from your marker to the cards. Players are allowed to turn two cards over at a time.
- If they match the player can take them back to their start marker and go again.
- If the cards do not match the player must turn them back face down, run back to the start marker and go again.
- How quickly can you find the pairs?
- Repeat the game, can you beat your time?
- Make this harder by using the whole pack.
